

AUTOMATIC
ROTATIVE BOTTLE
UNSCRAMBLER

25 Years of
COMPLETE LINE SOLUTIONS

THE RIGHT SIDE OF TECHNOLOGY

SEPPA has conceptualized the most Innovative methods for the growing demand of efficient bottle water packaging and complete line solutions.

SEPPA's focus is on sustainable production of the Unscrambler and consistency to create solutions for enhancing productivity, hygiene and line speed.

SEPPA designs are driven towards maximum uptime and reduced cost of production. SEPPA's Ability to handle different shapes of bottle is the most important feature for creating line Flexibility. This helps in launching new products designs and packaging types in the same line”

BOTTLE UNSCRAMBLER

The bottles are introduced in the upper side of the machine and then uniformly distributed along the perimeter of the rotating disc in which the sorting pockets are also installed.

The second generation of high speed preforms unscrambler/loader from seppa introduces two important and innovative operational ideas:

- radial orientation of the Bottle
- pre-loading pockets.

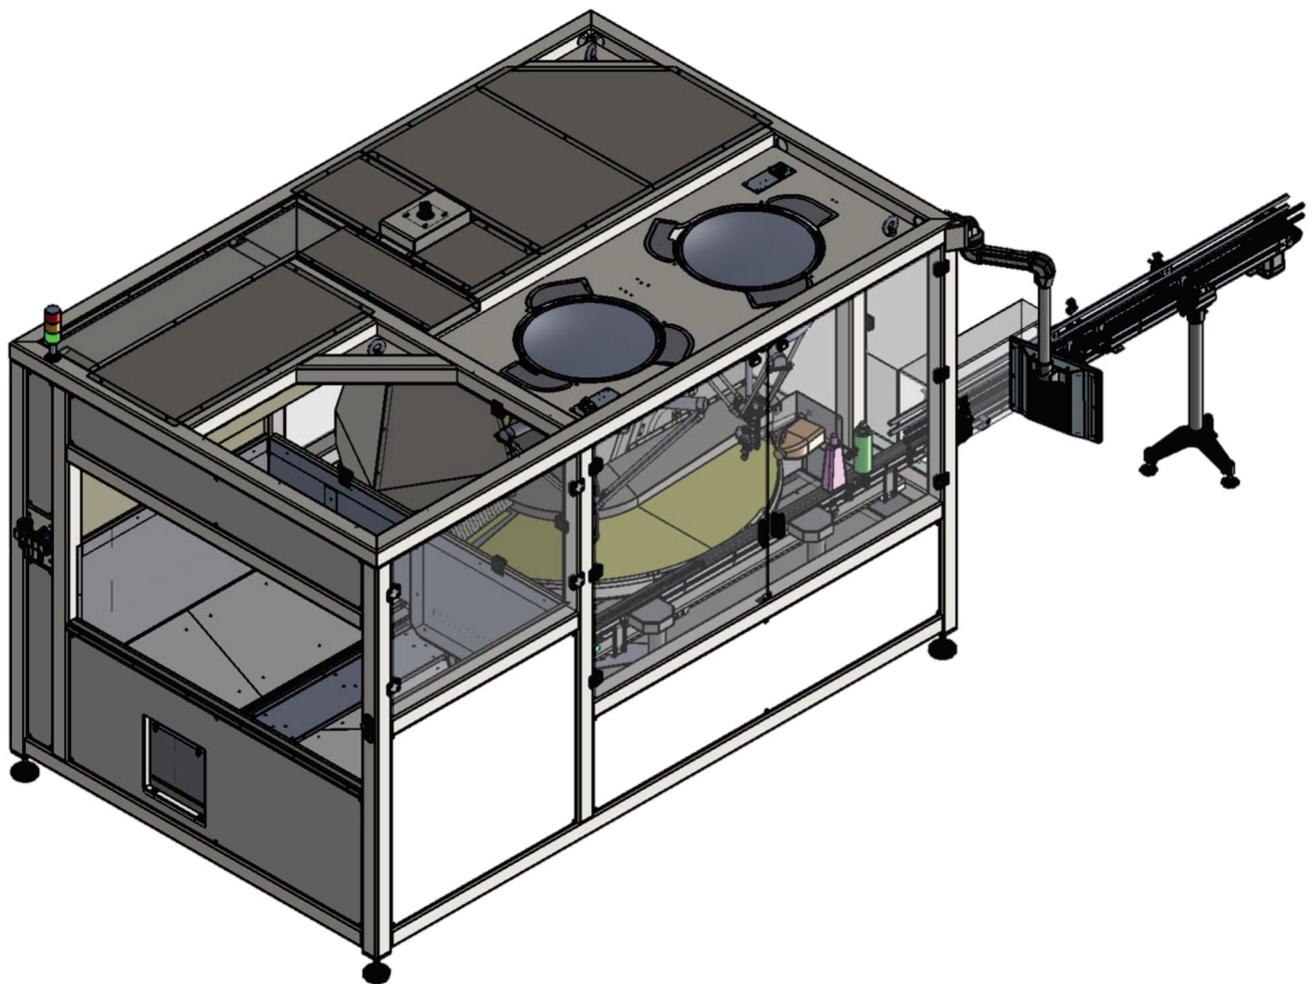

With the introduction of these two solutions the seppa unscrambler increases the output in bottles per hour correctly delivered to the blow mold starwheel infeed.

When a preform reaches the outskirts of the pocket, gravity makes the preform turn right side up; at a precise position during the rotation of the disc the bottle is extracted and directed to the inclined rails.

Combining the bottle unscrambler with the Flex-Clamp preforms conveyor allows to lower the overall height of the machine bringing the top components at operator level without the use of ladder and platform when performing regular maintenance and changeover operations.

The Seppa bottle unscrambler is available in standard and ultraclean executions.

MODEL	BOTTLE 0.2 / 0.5 lt	BOTTLE 1 lt	BOTTLE 1.5 / 2 lt
SBU 60	3600 Bottle / hr	2000 Bottle / hr	1000 Bottle / hr
SBU 100	6000 Bottle / hr	4500 Bottle / hr	3000 Bottle / hr
SBU 200	12000 Bottle / hr	9000 Bottle / hr	6000 Bottle / hr
SBU 300	18000 Bottle / hr	15000 Bottle / hr	12000 Bottle / hr
